The Ankors for the webinar was Swarnim Koteswar and Mansi Upari. 600+ People attended the live Webinar. Among which few were Members of NSS and others were Non Members of NSS.

The topics that were discussed in Webinar are:

- 3.How to produce Eco-friendly, Reusable Sanitary Pads.

In India, 23million women drop out of schools each year when they start menstruating. In fact, 71% of school-going girls remain unaware of menstruation due to lack of proper discussion. Menstrual hygiene is vital to the empowerment and well-being. It's about more than just to access to sanitary pads and appropriate toilets. Also people are not aware about the sustainable and ecofriendly sanitary products which helps to maintain the health of the person and the earth. And by motivating people to use sustainable and eco-friendly sanitary products during menstruation we are helping to reduce pollution to some extent.

Ritva foundation helps people to choose healthy sanitary option during menstruation with a dual motive of keeping the human body healthy and embracing the ecological balance simultaneously.

**Date: 27/09/2020**

On 27 September, 2020 from 3:00 pm to 4:00 pm NSS Team of SAOE In Collaboration with Bramhand Sansthan organized a webinar on "Supporting Orphanage Via Caring and Education". Webinar was conducted on Digital Platform, YouTube on Channel Awakening Reality. Aman Kumar Tiwari (President of Saeo NSS) contacted the Bramhand Sansthan for conducting webinar in collaboration with NSS team of Saeo.

The Speakers for the webinar were C.M Redkar Sir (Secretary Bramhand Sansthan, Pune. The Anchors for the webinar were Yogesh Joshi and Yashasvi paunikar. 500+ People attended the live Webinar. Among which few were Members of NSS and others were Non Members of NSS.

The Topics Discussed In Webinar Were –

- 1) What steps can be taken to reduce the no. of orphans?
- 2) What we can do development about orphanages?
- 3) What development is lacking for orphanages?
- 4) What facilities are provided by government for orphanages?
- 5) What about the education of orphans?

A new study by an International Children’s Charity's has found that 4 per cent (20 million) of India's child population are orphans. Most of these children have been abandoned by their parents. In fact, the charity estimates that only 0.3 per cent of these orphans are children whose parents have actually died. The high proportion of abandoned children among orphans highlights the fact that poverty is a major reason behind the situation. Indeed, the study found that states such as Uttar Pradesh, Bihar and West Bengal had more orphans than India’s richer states. Generally, the country's central and eastern regions were found to be worse affected than the north and the south. Orphaned children are greatly in need of care in protection, being among the most susceptible to poverty, child labor and child trafficking.

The Objective of Bramhand Sansthan is to help orphan people and make them aware about education, social services and environment. Also motivate them by telling them stories about saints, freedom fighters etc.

**Digital Platform–GOOGLE MEET**

On 2nd October, 2020 from 12 pm to 1:00 pm NSS Team of SAOE organised a webinar on "PLEDGE FOR EYE DONATION". Webinar was conducted on Digital Platform, Google meet. The Speakers for the webinar were Ankita Pol, Pooja Sahanjwani, Niva Ravjiani. 52+ Volunteers of NSS Team of SAOE attended the live Webinar. After Webinar, All the Members present in the Webinar took a Collective Pledge to Donate Eyes.

According to a WHO report published in 2010, globally, 285 million people suffer from visual challenges. Of these 285 million, 246 million suffer from low vision while the remaining 39 million suffers from blindness. Of the total number of visually impaired and blind people in the world, 65% and 82% respectively, are over 50 years of age. In South East Asia which includes India, over 48 thousand people per million suffer from visual impairment, while over 43 thousand per million suffer from low visibility and over only 6 thousand per million suffer from blindness.

Apart from a few reasons why certain conditions cannot be cured, most people suffer from curable ailments, especially those that can be cured with the help of donated eyes. In India nearly 2- 3 million people suffer from corneal blindness which could be cured through eye donation. Cornea is a clear tissue in our eyes, which allows light to pass through, enabling the brain in comprehending shapes and colours. A person is said to be suffering from corneal blindness when the cornea gets cloudy or obstructed in some other way. This reduces visibility. Now, this can be cured with the help of eye donation, which is an act of donating eye posthumously.

**WHAT IS CORNEA?**

Cornea is the clear, transparent, tissue covering the front of the eye.

It serves as a window to allow light to enter the eye.

Vision will be dramatically reduced or lost if the cornea becomes cloudy due to disease, injury or infection.
