"Cyber Security and Data Sciences"

Hosted by

AISSMS Institute of Information Technology, Pune

Summary

The one Week FDP is arranged by AISSMS Institute of Information Technology, Pune. in association with Shivaji University, Kolhapur under MHRD government of India initiative Pandit Madan Mohan Malviya National Mission on Teachers and Teaching (PMMNMTT). The Programme was aimed to develop, understand the basic concept and hands on Cyber Security and Data Sciences that are required in our research and teaching learning Process.

Various well known Resource persons from the Industries and different Shivaji University were invited for Presenting their Knowledge and share their experiences. The Inaugural function preceded by the Principal Dr P.B.Mane of AISSMSIOIT Pune. He elaborated the global scenario of Cyber Security and Data Sciences and stressed on the up-gradation of the education policies at present we have.

One week Refresher Programme was organized daily in four sessions out of four sessions two sessions based on theory and two based on hands-on. Imminent personalities from well known Organizations such as SPP University and well known industries, have enlightened the participants from various colleges of India on various issues related to MEMS Power Sources and Electronic Packaging and its application in Education field as well as in Industry.

One day they have conducted an online test on workshop course content in afternoon session for getting certificate from Shivaji university Kolhapur Sponsored by MHRD.

On last day the concluding ceremony was organized Dr.V K Bairagi Local Coordinator of the program AISSMSIOIT Pune and Speech of Dr. P B Mane principal AISSMSIOIT Pune and Dr. K S Oza Co-coordinator Shivaji university Kolhapur was very impressive. The feedbacks from all the participants were collected. The one Week FDP on Cyber Security and Data Sciences was found to be very informative and use full for the participants.

On

Cyber security and data science

Name of program : Cyber security and data science

Number of days: one week

Duration : 8 to 13 april 2019

Venue :SAE kondhwa pune

Contents of the workshop:

Day 1:Introduction and Computer Security-IComputer Security

Day 2:Network Security Day 3:Thursday, 05/09/2019Network SecurityII and Email SecurityI

Day 4Website Security I

Day 5:Website Security II and Cyber Law,

Day 6:Mobile Security and Cloud Security

assignments:1.Installing, Configuring and Commissioning of Proxy Serverusing FOSS.

Studying issues like Browsersecurity, email security, difference between http, https etc.

2.Perform port scanningusingNMAP (Network Mapper).

3.Analyse the network traffic using wireshark or any other network sniffer.

4.Collect the Owner's information using spyware.

5.Steganography: Perform data hiding using covered writing

6.Identification of virus infected file using virustotal.com

7.Understanding traceroute functionality using open visual trace route

8.Vulnerability analysis in web application using Zed Attack Proxy

9.Isolating WLAN Traffic using Separate Firewall for VPN Connection

Department of Electronics and Telecommunication

Summary of FDP on Cyber Security workshop by MHRD and PMMNMTT SAE, Kondhwa from 08/04/2019- 13/04/2019

Ethical hacking is an important tool in many national security agencies and even companies.

This workshop is specifically designed to provide the right knowledge to the aspiring Hacking and **Cyber Security** enthusiasts. This workshop explored the various means that an intruder has, to gain access to computer resources. It will investigate weaknesses by discussing the theoretical background behind, and whenever possible, actually performing the attack.

Cyber security is the practice of protecting systems, networks, and programs from digital attacks. These cyber attacks are usually aimed at accessing, changing, or destroying sensitive information; extorting money from users; or interrupting normal business processes.

Implementing effective cyber security measures is particularly challenging today because there are more devices than people, and attackers are becoming more innovative.

Workshop ended with participation certificates were given to all the participants.

(08-April-2019 TO 13-April-2019)

Organized and Sponsored by

Shivaji University, Kolhapur & MHRD Government of India

Summary

The one Week FDP is arranged by **Sinhgad Academy of Engineering, Kondhwa, Pune.** in association with Shivaji University, Kolhapur under MHRD government of India initiative Pandit Madan Mohan Malviya National Mission on Teachers and Teaching(PMMMNTT).The Programme was aimed to develop, understand the basics concept and hands on Cyber Security and Data Sciences that are required in our research and teaching learning Process. Various well known Resource persons from the different Industries and Shivaji University were invited for presenting their knowledge and share their experiences. The inaugural function preceded by the Principal Dr. K. P. Patil of Sinhgad Academy of Engineering, Kondhwa, Pune. He elaborated the global scenario of Cyber Security and Data Sciences and stressed on the up-gradation of the education policies at present we have.

For this One week Refresher programme, daily four sessions were planned and organized. Out of four sessions two sessions were based on theory and two based on hands-on. Imminent personalities from well known Organizations such as SPP University and well known industries, have enlighten the participants from various colleges of India on various issues related to MEMS Power Sources and Electronic Packaging and its application in Education field as well as in Industry.

On the conclusion day, online test was conducted based on the contents of workshop course in afternoon session. This evaluation helps the organizer to find out the active participation of the beneficiaries and accordingly to distribute the certificates from Shivaji university Kolhapur and Sponsored by MHRD. The workshop was successfully concluded by the auspicious presence of Dr. K. S. Oza Co-coordinator Shivaji University Kolhapur and Dr. K. P. Patil, Principal SAE Pune. The feedbacks from all the participants were collected. The one Week FDP on Cyber Security and Data Sciences was found to be very informative and use full for the participants.

Imminent personalities from well known Organizations such as SPP University and well known industries, have enlightened the participants from various colleges of India on various issues related to MEMS Power Sources and Electronic Packaging and its application in Education field as well as in Industry.

On the conclusion day, online test was conducted based on the contents of workshop course in afternoon session. This evaluation helps the organizer to find out the active participation of the beneficiaries and accordingly to distribute the certificates from Shivaji university Kolhapur and Sponsored by MHRD. The workshop was successfully concluded by the auspicious presence of Dr. K. S. Oza Co-coordinator Shivaji University Kolhapur and Dr. K. P. Patil, Principal SAE Pune. The feedbacks from all the participants were collected. The one Week FDP on Cyber Security and Data Sciences was found to be very informative and use full for the participants.

One Week FDP

ON

“Cyber Security and Data Sciences”

(08-April-2019 TO 13-April-2019)

Organized and Sponsored by

Shivaji University, Kolhapur & MHRD Government of India

Summary

The one Week FDP is arranged by **Sinhgad Academy of Engineering, Kondhwa, Pune.** in association with Shivaji University, Kolhapur under MHRD government of India initiative Pandit Madan Mohan Malviya National Mission on Teachers and Teaching (PMMMNMTT). The Program was aimed to develop, understand the basic concept and hands on Cyber Security and Data Science that are required in our research and teaching learning Process. Various well known Resource persons from the different Industries and Shivaji University were invited for presenting their knowledge and share their experiences. The inaugural function preceded by the Principal Dr. K. P. Patil of Sinhgad Academy of Engineering, Kondhwa, Pune. He elaborated the global scenario of Cyber Security and Data Sciences and stressed on the up-gradation of the education policies at present we have.

For this One week Refresher programme, daily four sessions were planned and organized. Out of four sessions two sessions were based on theory and two based on hands-on. Imminent personalities from well known Organizations such as SPP University and well known industries, have enlightened the participants from various colleges of India on various issues related to MEMS Power Sources and Electronic Packaging and its application in Education field as well as in Industry.

On the conclusion day, an online test was conducted based on the contents of workshop course in afternoon session. This evaluation helps the organizer to find out the active participation of the beneficiaries and accordingly to distribute the certificates from Shivaji university Kolhapur and Sponsored by MHRD. The workshop was successfully concluded by the auspicious presence of Dr. K S Oza Co-coordinator Shivaji University Kolhapur and Dr. K. P. Patil, Principal SAE Pune. The feedbacks from all the participants were collected. The one Week FDP on Cyber Security and Data Sciences was found to be very informative and use full for the participants.

Department of Electronics and Telecommunication

**Summary of FDP on Data Science workshop by MHRD and PMMNMTT
SAE, Kondhwa data science from 24/06/2019- 29/06/2019**

This workshop in Data Science gives a broad exposure to key concepts and tools from Python, R to Machine Learning and more. Hands-on labs and project work on RUBICS bring these concepts to life with our trainers and teaching assistants to guide you along the way.

Data science continues to evolve as one of the most promising and in-demand career paths for skilled professionals. Today, successful data professionals understand that they must advance past the traditional skills of analyzing large amounts of data, data mining, and programming skills. In order to uncover useful intelligence for their organizations, data scientists must master the full spectrum of the data science life cycle and possess a level of flexibility and understanding to maximize returns at each phase of the process.

Data scientists need to be curious and result-oriented, with exceptional industry-specific knowledge and communication skills that allow them to explain highly technical results to their non-technical counterparts. They possess a strong quantitative background in statistics and linear algebra as well as programming knowledge with focuses in data warehousing, mining, and modeling to build and analyze algorithms.

In the past decade, data scientists have become necessary assets and are present in almost all organizations. These professionals are well-rounded, data-driven individuals with high-level technical skills who are capable of building complex quantitative algorithms to organize and synthesize large amounts of information used to answer questions and drive strategy in their organization. This is coupled with the experience in communication and leadership needed to deliver tangible results to various stakeholders across an organization or business.

Workshop ended with participation certificates were given to all the participants.

REDU NOTE 5 PRO
DUAL CAMERA

Summary on Cyber Security and Data Science F.D.P

Date: 24th June - 29th June at SAE, Kondhwa

All submissions underwent a meticulous review process, and nine papers were accepted for publication in this special issue. The following is a short summary of the findings of each of these papers. Cyber Physical Power Systems (CPPS) are a critical infrastructure and therefore a favorable target of cyberattacks. In "VHDRA: A Vertical and Horizontal Intelligent Dataset Reduction Approach for Cyber-Physical Power Aware Intrusion Detection Systems," the authors proposed the use of the Nonnested Generalized Exemplars (NNGE) algorithm and showed that it is among the most accurate and suitable classification methods for developing an intrusion detection system for CPPS because of its ability to classify multiclass scenarios and handle heterogeneous datasets. Furthermore, VHDRA proposed mechanisms to improve the classification accuracy and speed of the NNGE algorithm and reduce the computational resource consumption. It achieves this by vertical reduction of the dataset features by selecting only the most significant features and horizontally reduces the size of data while preserving original key events and patterns within the datasets using the State Tracking and Extraction Method approach.

All the faculties gave exams on Basic and intermediate level and earned the badges and certificates for the same. A member of Cyber Security and Data Science organization was the resource person for the workshop.

MHRD Government of India Sponsored One Week FDP
(09-Dec-2019 TO 14-Dec-2019)

ON

“Cyber Security and Data Sciences”

Hosted by

K.J College of Engineering and Management Research, Pune

Summary

The one Week FDP is arranged by K.J College of Engineering and Management Research, Pune. in association with Shivaji University, Kolhapur under MHRD government of India initiative Pandit Madan Mohan Malviya National Mission on Teachers and Teaching (PMMNMTT). The Programme was aimed to develop, understand the basic concept and hands on Cyber Security and Data Sciences that are required in our research and teaching learning Process.

Various well known Resource persons from the Industries and different Shivaji University were invited for Presenting their Knowledge and share their experiences. The Inaugural function preceded by the Principal Dr S.S.Khot of KJCOEMR Pune. He elaborated the global scenario of Cyber Security and Data Sciences and stressed on the up-gradation of the education policies at present we have.

One week Refresher Programme was organized daily in four sessions out of four sessions two sessions based on theory and two based on hands-on. Imminent personalities from well known Organizations such as SPP University and well known industries, have enlightened the participants from various colleges of India on various issues related to Cyber Security and its application in Education field as well as in Industry.

One day they have conducted an online test on workshop course content in afternoon session for getting certificate from Shivaji university Kolhapur Sponsored by MHRD.

On last day the concluding ceremony was organized V B Maral Local Coordinator of the program KJCOEMR Pune and Speech of Dr. D C Mehetre HOD computer department KJCOEMR Pune and Dr. K S Oza Co-coordinator Shivaji university Kolhapur was very impressive. The feedbacks from all the participants were collected. The one Week FDP on Cyber Security and Data Sciences was found to be very informative and use full for the participants.

One Week FDP

ON

“ Data Science ”

(24-June-2019 TO 29-June-2019)

Organized and Sponsored by

Shivaji University, Kolhapur & MHRD Government of India

Summary

The one Week FDP is arranged by **Sinhgad Academy of Engineering, Kondhwa, Pune.** in association with Shivaji University, Kolhapur under MHRD government of India initiative Pandit Madan Mohan Malviya National Mission on Teachers and Teaching(PMMMNTT).The Programme was aimed to develop, understand the basics concept and hands on Cyber Security and Data Sciences that are required in our research and teaching learning Process. Various well known Resource persons from the different Industries and Shivaji University were invited for presenting their knowledge and share their experiences. The inaugural function preceded by the Principal Dr. K. P. Patil of Sinhgad Academy of Engineering, Kondhwa, Pune. He elaborated the global scenario of Cyber Security and Data Sciences and stressed on the up-gradation of the education policies at present we have.

For this One week Refresher programme, daily four sessions were planned and organized. Out of four sessions two sessions were based on theory and two based on hands-on. Imminent personalities from well known Organizations such as SPP University and well known industries, have enlightened the participants from various colleges of India on various issues related to MEMS Power Sources and Electronic Packaging and its application in Education field as well as in Industry.

On the conclusion day, online test was conducted based on the contents of workshop course in afternoon session. This evaluation helps the organizer to find out the active participation of the beneficiaries and accordingly to distribute the certificates from Shivaji university, Kolhapur and Sponsored by MHRD. The workshop was successfully concluded by the auspicious presence of Dr. K. S. Oza Co-coordinator Shivaji University Kolhapur and Dr. K. P. Patil, Principal SAE Pune. The feedbacks from all the participants were collected. The one Week FDP on Cyber Security and Data Sciences was found to be very informative and use full for the participants.

Rubics Data Science

Faculty Development Program

Prashant Pansare

Prashant Pansare, CEO – Rubics Labs

Date: 28/06/2019

FDP on Data Science and Rubics workshop by MHRD and PMMNMTT
SAE, Kondhwa data science from 24/06/2019- 29/06/2019

This workshop in Data Science gives a broad exposure to key concepts and tools from Python, R to Machine Learning and more. Hands-on labs and project work on RUBICS bring these concepts to life with our trainers and teaching assistants to guide you along the way.

Data science continues to evolve as one of the most promising and in-demand career paths for skilled professionals. Today, successful data professionals understand that they must advance past the traditional skills of analyzing large amounts of data, data mining, and programming skills. In order to uncover useful intelligence for their organizations, data scientists must master the full spectrum of the data science life cycle and possess a level of flexibility and understanding to maximize returns at each phase of the process.

Data scientists need to be curious and result-oriented, with exceptional industry-specific knowledge and communication skills that allow them to explain highly technical results to their non-technical counterparts. They possess a strong quantitative background in statistics and linear algebra as well as programming knowledge with focuses in data warehousing, mining, and modeling to build and analyze algorithms.

In the past decade, data scientists have become necessary assets and are present in almost all organizations. These professionals are well-rounded, data-driven individuals with high-level technical skills who are capable of building complex quantitative algorithms to organize and synthesize large amounts of information used to answer questions and drive strategy in their organization. This is coupled with the experience in communication and leadership needed to deliver tangible results to various stakeholders across an organization or business.

**MHRD Government of India Sponsored One Week STTP
(06-May-2019 To 10-May-2019)**

ON

“Introduction to Artificial Intelligence”

Hosted by

AISSMS's Institute of Information Technology, Pune

Summary

The one Week STTP is arranged through ICT mode, by AISSMS's Institute of Information Technology, Pune in association with National Institute of Technical Teacher's Training and Research, Kolkata, under MHRD government of India initiative. The Programme was aimed to develop, understand the basics concept and hands on Artificial Intelligence that are required in our research and teaching learning Process.

Well known Resource persons from the IIT, Kolkata presented their knowledge and shared their experiences. The inaugural function presided over by the Principal Dr P. B. Mane of AISSMS's IoIT, Pune. He elaborated the global scenario of Artificial Intelligence and stressed on the up-gradation of the present education policies.

One week Refresher Programme was organized daily in four sessions. Out of the four sessions, two sessions based on theory and two based on hands-on. The eminent resource persons have enlighten the participants from various colleges of India on various issues related to Artificial Intelligence and its application in Education field as well as in Industry.

At the end of every day, they have conducted a online test on STTP course content in evening session for upgrading the knowledge of participants for getting certificate from NITTR, sponsored by MHRD.

On last day the concluding ceremony was organized Dr. V. K. Bairagi Local Coordinator of the program AISSMS's IoIT Pune. The feedbacks from all the participants were collected. The one Week STTP on Artificial Intelligence was found to be very informative and useful for the participants.

One week STTP(NITTR Calcutta)

On

Assessment and Evaluation under outcome based education

Name of program : Assessment and Evaluation under outcome based education

Number of days: one week

Duration :10 to 14 june 2019

Venue :SAE kondhwa pun e

Contents of the workshop:

started with the importance of Accreditation in the Global Competition. In this dynamic world of students and education, OBE forms the heart of CO's and PO's. She also shared various real life examples and real life roles as learner and thinker, listener and communicator, implementer and performer, problem finder and solver, planner and designer, creator and producer, teacher and mentor, supporter and contributor, team member and partner, leader and organizer. She also throws light on Bloom's Taxonomy. Various guidelines for forming CO's and strength of mapping them with Vision Mission Outcomes (VMO's). CO's for seminar, Project/mini project, co-curricular activity/assigned task etc. She also shared with us REVISED 'Bloom's Taxonomy' Action 'Verbs', for writing CO's.

Next session started with comparison of our present engineering curriculum and Industry expectations from engineering graduates. OBE is the building bridge to overcome the gap between the two. She discussed about the OBE implementation, attainment of CO's, PO's through survey, MOODLE etc. Rubrics term introduced which is the set of rules for measuring learning outcomes. She shared example as rubrics can be framed for seminars, project evaluation, teaching methodology etc, its evaluation. She also shared OBE related publications.

Next session describes about

describes OBE implementation in Curriculum, Teaching Learning Process, Assessment methods, Continuous Improvement and shares PO's for engineering, MCA and MBA. PO's can be classified as soft and hard PO's ie.. soft PO's includes arranging workshop, Industrial training, Industrial visit, Guest lecture, Arranging technical events, Hardware software design contest, Paper Presentations, Quiz, Use of ICT Tools, NPTEL Videos, MOOCs etc. She gave activity for all staff members to map CO's and PO's. She explains various methods for CO - PO - PSO Attainment, result Analysis etc.

NPTEL COURSE

INTRODUCTION TO RESEARCH

Summary on Eight weeks NPTEL FDP Workshop on Introduction to Research from Feb -April 2019.

This course aim was to introduce students to the important aspects of research. The intent of the course was to make students aware of the details associated with formal research and to help students overcome common misconceptions that may be present in their minds. By going through this course, students are likely to be able to take up research activities in a more systematic and formal manner right from the beginning.

Topics covered:

Week 1 : A group discussion on what is research; Overview of research

Week 2 : Literature survey , Experimental skills

Week 3 : Data analysis, Modelling skills

Week 4 : Technical writing; Technical Presentations; Creativity in Research

Week 5 : Creativity in Research; Ethics in Research

Week 6 : Design of Experiments

Week 7 : Intellectual Property

Week 8 : Department specific research discussions

NPTEL COURSE

CLOUD COMPUTING

Summary on Eight weeks NPTEL FDP Workshop on Cloud Computing from Feb -April 2019.

Cloud computing is a scalable services consumption and delivery platform that provides on-demand computing service for shared pool of resources, namely servers, storage, networking, software, database, applications etc., over the Internet. It is a model for enabling ubiquitous, on-demand access to a shared pool of configurable computing resources, which can be rapidly provisioned and released with minimal management effort. This course introduced various aspects of cloud computing, including fundamentals, management issues, security challenges and future research trends. This course is helpful for the students (both UG and PG levels) and researchers to use and explore the cloud computing platforms.

Topics covered:

Week 1 : Introduction to Cloud Computing

Week 2 : Cloud Computing Architecture

Week 3 : Service Management in Cloud Computing

Week 4 : Data Management in Cloud Computing

Week 5 : Resource Management in Cloud

Week 6 : Cloud Security

Week 7 : Open Source and Commercial Clouds, Cloud Simulator

Week 8 : Research trend in Cloud Computing, Fog Computing

The candidate has studied the above course through MOOCs mode, has submitted online assignments and passed proctored exams.
This certificate is therefore acceptable for promotions under CAS as per AICTE notifications dated 24th July 2018, similar to other refresher / orientation courses.
F.No. AICTE / RIFD / FDP through MOOCs / 2017-18

Summary on 08 weeks NPTEL Course and AICTE approved FDP on Health Research Fundamentals conducted by IIT Madras.

Date: 30/07/2018- 28/09/2018

Course layout :

Week 1: Conceptualizing a research study

Introduction to health research – Dr. Sanjay Mehendale

Formulating research question, hypothesis and objectives – Dr. P Manickam

Literature review – Dr. P Ganeshkumar

Week 2: Epidemiological considerations in designing a research study (1/2)

Measures of disease frequency - Dr. R Ramakrishnan

Descriptive study designs - Dr. Prabhdeep Kaur

Analytical study designs - Dr. ManojMurhekar

Week 3: Epidemiological considerations in designing a research study (2/2)

Experimental study designs: Clinical trials - Dr. Sanjay Mehendale

Validity of epidemiological studies - Dr. TarunBhatnagar

Qualitative research methods: An overview - Dr. TarunBhatnagar

Week 4: Bio-statistical considerations in designing a research study

Measurement of study variables – Dr. R Ramakrishnan

Sampling methods – Dr. R Ramakrishnan

Calculating sample size and power – Dr. R Ramakrishnan

Week 5: Planning a research study (1/2)

Selection of study population – Dr. P Ganeshkumar

Study plan and project management – Dr. Sanjay Mehendale

Designing data collection tools – Dr. TarunBhatnagar

Week 6: Planning a research study (2/2)

Principles of data collection – Dr. Prabhdeep Kaur

Data management – Dr. P Manickam

Overview of data analysis - Dr. P Manickam

Summary

Course Name: NPTEL Online Certification for Effective Engineering Teaching In Practice

Duration: Jan –Feb 2019

Traditionally, teachers are not trained to teach professional courses. Thus, they learn even the essential principles of teaching through experience, 'on the job'. This leads to a less than satisfactory in-class learning experience for most students in many courses, except if the teacher has a natural orientation to teaching. This course was aimed to introduce the essentials of facilitation of student learning ('teaching') in an interesting way to any teacher of professional courses, with a special focus on engineering. Further, education is a vast, old area of research, with rigorous, evidence-based knowledge that is useful for the facilitation of learning. However, the knowledge is not in an easily accessible form for teachers without experience in education research. This course was also aimed to begin bridging that gap, by appropriately introducing research in education to engineering teachers.

**A FDP on NPTEL Course Effective teaching methodologies for engineering
Jan 2019-Feb2019- four week course.**

Economic, academic, and social forces are causing undergraduate schools to start a fresh examination of teaching effectiveness. Administrators face the complex task of developing equitable, predictable ways to evaluate, encourage, and reward good teaching in science, math, engineering, and technology.

Evaluating, and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics offers a vision for systematic evaluation of teaching practices and academic programs, with recommendations to the various stakeholders in higher education about how to achieve change.

What is good undergraduate teaching? This course discusses how to evaluate undergraduate teaching of science, mathematics, engineering, and technology and what characterizes effective teaching in these fields.

Why has it been difficult for colleges and universities to address the question of teaching effectiveness? The committee explores the implications of differences between the research and teaching cultures-and how practices in rewarding researchers could be transferred to the teaching enterprise.

Evaluating, and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics provides a blueprint for institutions ready to build effective evaluation programs for teaching in science fields.

Summary

Course Name: NPTEL Online Certification for Fundamentals of Electrical Engineering

Duration: July-Oct 2018

This course was mainly for undergraduate First-Year Engineering students from all Specializations. This course was introduced and explain the fundamental concepts of basic electrical engineering. The basic concepts of DC and AC (Single Phase and Three Phase Circuits) network analysis, first order DC transients, steady state and phasor analysis of AC networks, series and parallel resonance and magnetic coupled circuits. This course also covered Single Phase Transformers, Three Phase Induction Machines and DC Machines. By the end of the course we gathered high-quality knowledge of basic electrical engineering.

Summary

Course Name: NPTEL Online Certification for Digital Circuits

Duration: July-Oct 2018

Digital circuits are part of any electronic design today. This also happens to be one of the core subjects for the undergraduate students in Electronics, Electrical and Computer Engineering. It forms the basis of many of the next level courses. The proposed course on digital circuits covered all the fundamental concepts in digital design. It primarily focused on the prescribed GATE syllabus for Electronics and Communication Engineering (ECE) specialization. The course started with the representations of numbers – different number systems and conversion between them, representation of integer and real numbers etc. This followed by combinational and sequential circuit design techniques. Data converters and semiconductor memories was covered. Microprocessor 8085 was discussed as a complete digital system example. Designed primarily as a single course covering the digital circuits portion of GATE syllabus, the course was also helpful for any other aspirant willing to learn digital electronics principles comprehensively in today's perspective.
