TESTIMONIALS

Sinhgad Institutes

" SAE has played an integral part in my development as a capable software engineer.

SAE's faculty are proficient and patient and they created a environment with good opportunities and resources to improve myself.

I am deeply indebted to Sinhgad placement cell for providing me the right guidance and platform to jump start my career in IT."

Mr. Prasanna Jain,

" Being part of the very first batch at SAE was a special experience in itself. We witnessed the campus getting built and flourish around us month by month, year by year. The H.O.D Prof. Dr. Abhay Adapanwar, Prof. Dr. Sunil Bangare, Prof. B. B. Gite, Prof. Devata Anekar, Prof. Dr. S. S. Kulkarni, Prof. Vanita Rokade, Prof. Navnath Pokale, Prof. Swati Joshi and Late Prof. Manisha Bahir are some faculty members among others that I will be ever grateful to. I will not be able to extend enough gratitude to all the administrative staff in the campus and in the library that has a voluminous collection of books and thousands of square feet of reading space. I would like to thank the esteemed faculty at SAE for providing me with several leadership opportunities as the College Captain for Street Plays, SAE's first College Magazine Committee Member, Cultural Representative for the Information Technology Department, President of Information Technology Students Association(ITSA), President of SAE's first inter collegiate innovation contest – INNOFEST and many more such avenues that have helped me identify my core strengths in leadership and coaching which have certainly helped me shape my career as a corporate leader and currently the Director of Human Resources at a global technology firm for their North America and UK regions. I wish the faculty, staff, students and the alumni at SAE the very best.

**Mr. Tushar Kad,
Director, Human
Resources at
Simeio Solutions,
USA**

"I am indebted to my institute for having taught me many things in life, but the most important lesson I learnt is how to be a better person. One of the greatest skills a student can take away from college is the skill for problem solving and a love for learning. This is what Sinhgad Institute and My teachers taught me."

" The SAE is much more than an Engineering college. The overall environment of the campus and Hostel is quite blissful and Inspiring. I really enjoyed spending my 4 years in College Hostel & Campus. The college always focus on Overall development of each student and make campus to corporate transition easy. The college extends the support to Various extra-Curricular activities including but not limited to Motorsports, Robotics, project competitions, Internships. I was a part of Team Forza racing wherein we developed All-Terrain Vehicle and competed at National Level. This helps to understand the technical as well as non-technical things practically. The college help me to kick start my Career. I did Internship in Atlas Compo in 3rd year, further in 4th year I got placed in Xicon International Limited, Mumbai through campus drive. I will always be grateful to all the faculty members, staff and SAOE team."

**Mr. Swapnil Fagare,
Engineer, Xicon
International Limited,
Mumbai,**
