REPORT on **BodhiTree Project**

BodhiTree, an open source platform developed at IIT Bombay

20/12/2021

This initiatives we have implemented at Sinhgad Institute of Manageement,Pune.Faculty members and students are suggested to register and use the platform.This has been migrated on www.sinhgad.edu sub domain bodhitree

BodhiTree combines the power of MOOCs with a Learning Management System (LMS). Teachers can assemble multimedia books made of chapters which in turn are composed of sections which include interactive videos (interactivity is achieved via periodic pop-up quizzes embedded within the video); auto-graded practice problems; auto-graded/grading-assisted lab exercises; reference material; slides etc. They can source content for this book from different sources, including adding their own content to create a customized book for their students. They can then use this book in conjunction with the rich set of LMS features provided by BodhiTree to conduct classes: 1) enrol students 2) impose weekly schedules; 3) interact with students via discussion forum/emails; 4) conduct labs/quizzes; 5) monitor student progress; 6) share mid-term/final marks with students etc. BodhiTree has particularly good support for Engineering colleges (Latex, Virtual labs, Software Labs etc).

Subject: BodhiTree, an open source platform developed at IIT Bombay- reg.
To: <directormca_siom@sinhgad.edu>

Dear Principal/Director,

It is great pleasure to announce **BodhiTree,** an open source platform developed at IIT Bombay, to empower teachers to conduct online classes (and later even regular classes once pandemic ends).

BodhiTree combines the power of MOOCs with a Learning Management System (LMS). Teachers can assemble multimedia books made of chapters which in turn are composed of sections which include interactive videos (interactivity is achieved via

periodic pop-up quizzes embedded within the video); auto-graded practice problems; auto-graded/grading-assisted lab exercises; reference material; slides etc. They can source content for this book from different sources, including adding their own content to create a customized book for their students. They can then use this book in conjunction with the rich set of LMS features provided by BodhiTree to conduct classes: 1) enrol students 2) impose weekly schedules; 3) interact with students via discussion forum/emails; 4) conduct labs/quizzes; 5) monitor student progress; 6) share mid-term/final marks with students etc. BodhiTree has particularly good support for Engineering colleges (Latex, Virtual labs, Software Labs etc).

BodhiTree is open-sourced and free to use. It's installation is very easy. An individual college or school can install and host an independent instance of BodhiTree either on their premises or on the cloud, with full control over the students'/teachers' data and content.

We strongly encourage your institution to adopt this platform. If you are interested in using the platform, please visit https://garuda.bodhi.cse.iitb.ac.in/ On this website,

1. You can fill a form to express interest in adopting the platform (Link: https://docs.google.com/forms/d/1fd3ZqPwGt25E5DLeEpVZQBX0WmYm6OuMDghfyqI3hZM/edit?usp=sharing)
2. You can see the required server configuration in case you want to install the server on your premises or on the cloud.
3. You can see a small 5min video of BodhiTree which demonstrates its features
4. You can explore the platform further by signing on the website. You can explore any of the available courses as a student (we specifically recommend seeing "Bodhi Tree and Safe Tools").

Both IIT Bombay and AICTE will provide needed guidance to help you install as well as run your courses over the platform. All applicants will receive detailed instructions on how to proceed further shortly after the deadline.

Hello,

Thank you for your interest in BodhiTree. You likely signed up on BodhiTree in response to the email from AICTE.

As a next step, we request you to kindly fill the form at: https://docs.google.com/forms/d/e/1FAIpQLSc8mOGQNb9p7h_KlDtC_H3xfiUpXpTdwXdQafSLuBhYSHx3aQ/viewform

Note that the form link given on our website (https://garuda.bodhi.cse.iitb.ac.in/) yesterday (22 Sep) was incorrect due to a configuration error. We have corrected the link as of 23 Sep 10am, and the corrected form link is given above. If you filled the (incorrect) form prior to 10am on 23 Sep, we request you to kindly fill the corrected form above. We apologize for the inconvenience.

We look forward to working with you to setup BodhiTree for your college/institute.

Thanks and Regards,
Bhaskaran Raman, on behalf of the BodhiTree team.
Professor, Dept of CSE, IIT Bombay.

BodhiTree needs the following server configuration, depending on the number of students it is required to support.

Students (upto)	Configuration	Cloud Server Cost (**per month**; from linode.com)	Physical Server Cost (one time cost; approx)
1000	8 GB RAM, 4 CPU Cores, 160 GB SSD	Rs. 3200	Rs 50,000
2000	16 GB RAM, 6 CPU Cores, 320 GB SSD	Rs 6400	Rs 1,00,000
4000	32 GB RAM, 8 CPU Cores, 640 GB SSD	Rs 12800	Rs 2,00,000

** Linode.com is one of the cheapest cloud service provider

If sufficient institutions want third party services to install and manage BodhiTree, we will put in a place a service for this and negotiate a good price. This third party can provide one time installation as well as maintenance/support during use. In this model, you can either 1) still pay for the server yourself (see the table); third party will just install and manage the software or 2) outsource the entire operation to the third party.

Open letter to Students of SIOM
On
"Power of Fitness"

Dear Students,

I am here to share the idea of 'staying fit and healthy' during your student days. Please be informed that our health and fitness are more valued than our wealth. We believe that a healthy and fit student can function well physically as well as mentally and for that the surroundings need to be peaceful and clean and you as an individual should focus both on health and wealth. Not to forget …… that a balanced diet would also save your day and keeps the doctor away…

In reality, happiness comes only when we are healthy and fit. But today we live in a Tech era where we are obsessed with attaining material rather than mental and physical assets and we tend very often to ignore our health.

Being in the profession which drives us to stay put in front our screen for prolonged hours, we slowly become oblivious of the fact that exercise is the dire necessity for all.Prolonged sitting in front of the computer not only affects our mind but the body as well. Poor sitting postures may lead to backache issues, anxiety, discomfort and weight gain from lack of movement. According to research, sitting too long could lead to heart diseases and other complicated ailments.Overuse of computers can cause physical afflictions, such as eye strain, scoliosis, vision abnormalities, Carpal Tunnel Syndrome etc And so it is important that you know how to prevent from sitting for long hours in front of a machine and use your few minutes to exercise and jog for a robust health. An erect posture in due course can also help prevent deformities in the long term .

As per my experience observe and practice the below guidelines :

To maintain good health and fitness at all times,we need to take care of hygiene and sanitation around us. Apart from healthy diet we must maintain cleanliness in our room, house and nearby surroundings.
We rush after money and social status and we forget about our health. My question to all of you: What's the value of life if we don't live healthy and stay fit? So requesting you all to open your eyes and see the reality…. do exercises,yoga and meditation for a healthy and long life.

Remember the verse of Dalai Lama "**Happiness is the highest form of health**"

Thanks for Healthy & Happy Reading!

Kind regards,

Dr. Chandrani Singh

How we started?
✓ We are practicing design and innovation based practices within campus from a long period.
✓ Design Innovation Centre (A project under MHRD) was also initiated in 2015 to fulfill same objectives,
✓ MIC IICs was also initiated before couple of years.
✓ Apart from this the incubation was in practice under the umbrella of Atal Incubation Centre Since 2017.
✓ Similarly we also have a dedicated IPR Cell.
✓ Overall our university already had ambitious programs/ centers to promote and practice innovation for entrepreneurship.

✓ Although, we had a considerable infrastructure in the campus, but it not enough to provide innovation and incubation facilities to the maximum students enrolled in the university; because the strength (over 25000 students).
✓ In such scenario a dedicated policy for incubation and start-up has significant relevance.
✓ We were delighted to here the new policy regarding incubation and start-up by the govt. of India.

Message for other institutes
An institute should focus on innovative practices with regular teaching and learning; it will be a significant tool for an impressive entrepreneurial outcome. A collaboration with local industries may play a vital role in nurturing the early stage start-ups. Incubation exercises with MSME should be encouraged. If possible than institute should figure out the unorganized nearby industries and take it as an opportunity to transform these into structured industry.

✓ We had already various innovation and incubation programs which will be held on the same patterns, and with this policy the number of innovation (Prototype + IPR) and Incubation (Start-ups) will be increased by at least three times.
✓ We are running innovation and entrepreneurship related courses, which will be upgraded (i.e. Certificate course in to UG & PG). Some new course in specific subjects but focused on entrepreneurship will be initiated in upcoming academic year.

a. Beginning of our journey of NISP implementation
• Tue, Jun 16, 2020 we have received mail from MHRD's Innovation Cell that on recognising the nominated Faculty to implement NISP.
• Since I have three years of experience with MSME incubation centre and NAIN incubation centre at P. A. College of Engineering, Mangalore, it did not take much time in implementing NISP at our institution.
• Starting with MSME incubation centre, Government of India and NAIN incubation centre, Government of Karnataka at our institution we already had a "Institute-level Innovation Council".
• Under this guidance We have conducted pre-ideation, ideation, Ideathon, Boot camps and entrepreneurship programmes to students and faculties.
• Hence when we decided to implement NISP at our institution beginning was not a very difficulty task.
• During Covid 19 pandemic period team work was done to implement the NISP at our institution with our own interest.

Session on Design for Clean and Sustainable Cooking services

Session 11

15 December, 2020; 1500 – 1700 Hrs

Session Theme - Design for Clean and Sustainable Cooking services

Partner – Modern Energy Cooking Services (MECS) Programme

As per, **World Bank** report "**The State of Access to Modern Energy Cooking Service",** globally 4billion lack the access to Clean Cooking, resulting in an economic opportunity cost of **US$2.4 trillion.** Existing strategies ar struggling to solve the problem of unsustainable, unhealthy but enduring cooking practices which places a particular burden on women. After decades of investments in improving biomass cooking, focused largely on increasing the efficiency of biomass use in domestic stoves, the technologies developed have had limited impact on development outcomes.

In India, considerable effort has been made towards development of Improved cookstoves, providing LPG acces to over 80million households under the PMYU Programme are prominent. India has already achieved the status electricity surplus nation in September 2020, however have very negligible reliance of Electric Cooking. Electricity is Affordable and Available and it being used as **Cooking Energy is Convenient, Safe and Emissio free**. Further, using Electricity as cooking fuel can help reduce India's Import burden for LPG.

There are available clean cooking devices and systems to be developed that can work in **weak grid or off-grid contexts**. The fact that this then generates **a much-needed additional load and potential revenue stream for energy providers**, as well as the potential to demonstrate and release funds as a result of the substantial carbon emission reductions, means that the barriers to households securing eCooking devices can also be massively reduced. India's world class manufacturing, technology and research base, clearly stands to benefit economically from the foreign and domestic need for **clean cooking solutions**, and position itself as a **global clean cooking manufacturing hub**.

The session aims to bring together Clean Cooking Device Manufacturers, Researchers, DISCOMs, Policy Make Funding Agencies and other Agencies to develop sustainable and clean cooking solutions to help India make a radical and sustainable shift towards Clean Cooking. Further, the session also explores opportunities for Indian Device Manufactures to enable the shift to Clean Cooking Globally.

1500 – 1510 Hrs	Introductory remarks by Session Chairman	**Mr. Kolluru Krishan** Chairman of CVC India Infrastructure**;** Managing Director of Ansaldo Energia's Indian JVC (1994-2002) & Former Vice President of Dodsal, General Manager of Voltas
