### Feedback on Syllabus from Stakeholders

Feedback is an essential component of the educational system. It can be incorporated to enhance teaching and learning techniques since it has an immediate impact on the process of acquiring knowledge and has a direct impact on both teaching and learning.

Feedback contributions all stakeholders in understanding the subject matter and provides clear direction on how to improve their learning technique. Feedback can help stakeholders to gain confidence, self-awareness, and enthusiasm for what they are learning. Giving students or faculty relevant feedback can help them improve their academic or fieldwork performance. There is a great importance of feedback in improving learning experience for the students. This has also significant effect in professionalizing teaching in the higher education level. However, feedback is considered as a difficult issue in this arena.

This is (MCA department) the professional course. Hence department established mechanism to collect feedback from students faculties and alumni. Now we are collecting it using Google forms. Feedback is the fundamental principle that underlies all self regulating systems. The feedback from all stakeholders in terms of its relevance and appropriateness are considered to be a key aspect for enhancing and redefining the Institute. Feedback is the impact to a system component that is a consequence of an action performed by that component. The Institute is committed to obtain timely and appropriate feedback from different stake holders to reflect on the progress and development effectively.
