The three old friends.

Three close friends who gather or come together to meet each other once a year discuss their life and these ^{time} suddenly they feel something different and not sure will they be able to meet next year or will they be alive until then.

The current breath may not be or maybe followed by next breathe about this no one can be certain. people consider life in terms of year they have lived or going to live but the fact remain is anything can happen.

So life rather than days flows from one movement to the next. so be grateful now to the people, your friends and family and take it as blessing for having them in your life right now.

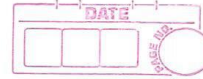

"Be Grateful to others."

Good.

The Old Friends Story.

Long back there were three friends, having busy life as their were scholars they decide that they will meet once a year for staying in touch. After many year they noticed that they are getting older & older. On one meeting one scholar said we all are here together this year enjoying each other company, what about our next meet, any thing can happen. Life is limited. Second scholar laugh and said you are thinking of next year I am doubtful about tomorrow, anything may happen. Today i sleep and next morning didnt wake up. What then. The one among them was guilt and just listening them. He ~~was~~ ^{looked} looking towards them thoughtfully and said to second friend you are speaking about tomorrow I dont know if each breath I draw will be my last who can say with certainty. So this story tells us future is unpredictable live the moment you have, do what you want to do. And at last all things are temporary. The meaning is for how you treat people & how people get affected you. After death only one thing is that The One who loves us will miss us.

Very well explained.

My Birthday with
Drums

8/12/22

① It was the day of my birthday when this unforgettable experience happened. It was a early morning for me because of my birthday.

② I was very excited for the celebration and all the present which i would be receiving.

My mother started preparing for my favourite food and the tasty dessert which I crave the most.

Everyone was so excited for the celebration. My father even took a early leave for the celebration. Seeing all this prep and excitement I was flying high above the sky.

③ The party started at the evening with cake-cutting and followed by the food. I was presented with many gifts and the one which I got most excited was

④ Drums. As soon as I recieved my gifts i started playing them but soon my huge excitement turned into despair. with the loud noise the drums created I got the scolding from my parents and with these the party ~~complected~~ and everybody went home making birthday a roller coaster ride.

Report

Best out-of-waste simply means to make something innovative and attractive out of the material that is of no use otherwise.

Recycling and reusing the valuable waste material can result in development of fantastic and usable products. Rather than putting these waste materials into the landfills, various innovative and creative ideas can be put together to being something new and useful.

The main objective of conducting this activity is to celebrate “**Creativity and Innovation Day**” and motivate students for creativity. In order to make students aware of the uses of waste material and to give them a lesson on reducing waste to save our future ‘**Best from Waste**’ activity was organised at **SKN Sinhgad School of Business Management**, for the students of MBA. It explored and encouraged creativity in students and offered them a platform to showcase their skill. It also inspired students to think and work creatively and promote artistic excellence.

On 2nd February 2023, SKNSSBM organized a guest session on "First Aid Training Program." The session began with felicitating the Guest speaker/Trainer, Dr. Samruddhi Hulyalkar, Department of Emergency Medicine, SKNMC&GH.

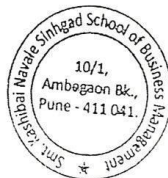

The objectives of the session were:

The main objective of the session is teaching students how to provide immediate attention to a sick or injured person at the scene. Students should be able to provide First aid help and prevent the situation from getting worse while waiting for full medical care. They should be

- - Able to understand how and when to administer first aid
- - Able to provide appropriate treatment for the purpose of preserving life
- - Able to minimise the consequences of injury until the arrival of medical assistance

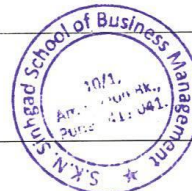

Dr. Samruddhi Hulyalkar explained the examples of life preservation in a first aid course, i.e., Providing CPR or attending to a choking person. She also explained how it helps to maintain air circulation in the body and clearing blocked airways while waiting for medics & prevents other severe conditions, like brain damage and even a heart attack, which can happen within minutes. In this first aid training program, participants learned how to position an unconscious person/ so that breathing airways aren't obstructed. The session was highly appreciated by students.

Brief Report:

Financial modeling is the process of creating a summary of a company's expenses and earnings in the form of a spreadsheet that can be used to calculate the impact of a future event or decision. Financial modeling is one of the most highly valued, but thinly understood, skills in financial analysis. The objective of financial modeling is to combine accounting, finance, and business metrics to create a forecast of a company's future results. A financial model is simply a spreadsheet which is usually built in Microsoft Excel, that forecasts a business's financial performance into the future. The forecast is typically based on the company's historical performance and assumptions about the future, and requires preparing an income statement, balance sheet, cash flow statement, and supporting schedules (known as a three-statement model). From there, more advanced types of models can be built such as discounted cash flow analysis (DCF model), leveraged buyout (LBO), mergers and acquisitions (M&A), and sensitivity analysis.
